Shijiazhuang Dazheng Apitherapy Hospital of Traditional Chinese Medicine dean Han Qiaoju, m.d., chief physician of TCM, as Shijiazhuang city CPPCC member, the world federation of Chinese medicine apitherapy branch, vice President, Chinese medical association branch, vice President, studies the traditional diagnosis technology and prescription of China association of Chinese medicine branch, vice chairman, standing director of China's Hebei province society of Chinese medicine, China's Hebei province apitherapy, director of professional committee member, China apitherapy, director of the continuing education base of Traditional Chinese Medicine.

She is one of the first batch of bee medical experts in China. She is the director of the national "twelfth five-year" key specialty project of rheumatology in China. In 2012, she was hired as the chief expert of Kaifeng Hospital of Traditional Chinese Medicine.

In recent years, our college has published more than ten papers in domestic and foreign journals. President Han was invited to give lectures and academic

exchanges in more than ten countries and regions, including the United States, Belgium, Germany, France, Dubai and Egypt. President Han Qiaoju enjoys a high reputation at home and abroad. She was successively awarded the titles of "expert of Chinese Traditional Medicine Apitherapy", "excellent Chinese traditional medicine apitherapy worker" and "excellent scientific worker of Chinese traditional medicine apitherapy throughout the country" and was awarded the title of "100 excellent scientific and technological workers of Shijiazhuang" by the municipal party committee and municipal government of Shijiazhuang.

President Han has been engaged in the clinical and scientific research of Chinese medicine apitherapy for 36 years and has been devoted to exploring and carrying forward the essence of Chinese medicine apitherapy, making positive contributions to the inheritance and development of Chinese medicine apitherapy. After more than 30 years of intensive research and careful summary, President Han took the lead in China in the organic combination of apitherapy and Traditional Chinese Medicine theory and created the "four combination of traditional Chinese medicine apitherapy", which is mainly based on bee acupuncture and wax therapy, combined with internal Chinese medicine and external Chinese medicine treatment. The therapy of natural green, hormone-free, non-toxic side effects, avoiding the conventional treatment that damage the liver, kidney, bone, in the treatment of ankylosing spondylitis, rheumatism, rheumatoid arthritis, scleroderma, diabetes mellitus, neuropathy, and wounds made breakthrough in the study and won the provincial science and technology achievement award.
